DEPLOYMENT

KEY FEATURES

Real-Time Monitoring
Monitor file system events in real-time including create, modify, delete, move, and permission changes.

Threat Detection
Detect suspicious and malicious activities using smart rule engine and behavior analysis.

Centralized Dashboard
Unified dashboard for logs, alerts, reports, and device management.

Cloud & On-Premise
Deploy on-premise or use our secure cloud for centralized management.

Compliance Ready
Meet security and audit requirements with detailed logs and reports.

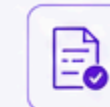

Operational Efficiency
Reduce manual effort and respond for organizations of all sizes.

BENEFITS

Proactive Protection
Stay ahead of threats with continuous monitoring and intelligent detection.

Data Integrity Assurance
Ensure your critical files remain safe, untampered and trustworthy.

Compliance Ready
Meet security and audit requirements with detailed logs and reports.

Operational Efficiency
Reduce manual effort and respond faster to security incidents.
